

Soap Bubbles !?

How To Get Rid Of The Invisible Death? How an infection becomes remedy? - What is "disease" Morgellons and how to "treats".

<http://www.iso.ro>

Along with this you have received your original file. It is written in Romanian. It is written, certainly, right. I apologize. These files have been automatically translated through the Babylon software and Google translate. They may contain translation errors. I'm a long time looking for human translators or proofreaders. I have no money to pay him. I try how can I convey accurate information. This book is not very popular. Although it is a very precise world buys. It gives a bad information. Not all people are able and willing to give up a toy for their health. They will not give up? Will be one way forward. It is one of only two certain issues on the planet. There is no tax. It is the other option.

MOTTO:

"I go slowly, but never go back"

*Abraham Lincoln, 16th president of the
U.S. (1809-1865)*

I dedicate this book my parents, those who were to receive the teachers and professor of physics in high school lady Margareta Capocceanu, whose devotion I guided the formation of a causal chain thinking, which has made it possible to understand the physical phenomena. So I could make the actual correlations between some harmful factors are unacceptably close to the human body. These factors attack any sort of alive cell of our body. Nobody is immune to these factors and the remaining in their neighborhood may result in a death. It is about a technological pollution real, cloak and extremely harmful to living organisms. Reading this book you will see how you came to be exposed to these factors. What produces it and how to defend against them?

The author
Eng. Calin Mircea Gascu

Contents

Foreword

Chapter 1: Soap Bubbles

What are the flasks of soap in my opinion?

But what is Morgellons

Do you know that you pay to have Morgellons?

The effect of the tunnel. How is manifested and what he is dangerous

The communication

The respect for your time

Chapter 2: Morgellons has no cure! Morgellons is a cure!

Who can help us?

Think... does not hurt!

Why not have found it others up now? ...

Chapter 3: How will you heal you?

What is the connection between us that we Morgellons?

Mutual Respect-dialog

Why doctors from all over the world looking for that wild solution?

What do the doctors when you do not find a real disease?

Chapter 4: The Responsibility

Ignorance or complicity?

The fog and smoke bombs

Lyme is a real disease but is used to cover something else

The fog in human eyes is difficult to spread.

Criminal ignorance or complicity death?

Which is the thing that makes me be so sure I am right?

Chapter 5: Theoretical considerations - demonstration logic and motivational

The energy of the waves

The depth of penetration

The Information

What we can measure and with what?

Areas affected areas and probe area

"The immune system". Why is the cancer dangerous?

Morgellons is the cure for cancer?

Steve Jobs criminal or suicidal?

Biological effects of electromagnetic fields in the high-frequency

The theoretical conclusions

Chapter 6: Conclusions on the reaction Morgellons and false Lyme diseases

Comparison of symptoms between different "diseases" invented reported to the disease of radiation.

Here is in short what happens:

Morgellons is a cure.

How is it they are so sure that what I say is true?

The stages of poisoning radiation

How we all have contaminated?

Which are the equipment that we can contaminate?

Conclusions:

Chapter 7: Reconstructing after the reaction of the Morgellons

How to stop the effects of the reaction

Morgellons without to give up to the Internet

Chapter 8: How we realize that our skin is affected by the radiation

Visual Method 1 (SHAPE)

Visual Method 2 (position)

The chemical method

Oil of cleaning and maintenance of the skin

Chapter 9: Final conclusions - check yourself!

Political initiatives

How do you check themselves?

How are we going to do to have access to the Internet?

You do not want or can not give up the dangerous toy?

What is there to be done?

Chapter 10 The fundamental mistakes in approaching the disease

Waiting for the authorities to solve the problems

Positive thinking

The management of the pain

Warriors

The use of substances

Chapter 11 Protection against nuisances.

Electromagnetic waves source of pollution

The steps required to follow

The protection of the active - a way to stop the contamination

Protection of passive - the best approach

What should not be never

Foreword

[<back to content>](#)

This book reveals a life experience, which shared with everyone, will relieve the very world of unnecessary suffering. Those who will judge with the head given by God for thinking it will help them. On those who use his head only for the setting is not longer save anyone.

I do not wish to change the world. Nobody can. I just try to inform correctly on a huge danger what hanging over all the creatures on the planet. The danger is generated by the explosion of the not guided information stupid or simply unguided and anyone technological developments chaotic without taking account of the harmful effects of certain factors extremely harmful. Are for production, are a man with a technical high training, but do not want the development at any price, especially if the price paid is the health of millions of people.

If we continue to develop certain activities, on this path, somewhere in time, it may be that the extinction of the dinosaurs we should look "flower at the ear".

In the Pandora was still a nuisance on our head. The huge danger is that this pain is invisible and, for the most part, undetectable. In these circumstances the danger is and higher. Many of the people without specialty training actually ignore the danger. It is not a palpable thing senses the usual means that there are no!? Yes, there is and is manifested rather ugly. Exists and is extremely hazardous.

"Diseases" such as cancer are frightening because they are not understood. Nothing is known about them or those who were supposed to know are so blind and opaque in mind that ignores the realities of almost obvious.

I admit that I have no medical training. Thank God that I have not. Perhaps if I had and I am like sheep in the herd and not notice a link between the interdisciplinary areas which may not seem to have the connection. For this reason please look at all of the below once a man has a disease and on which the health care system the world couldn't help him. You are the other people that the same health care system is not able to help them.

God gave me the head to suit it environment in which they live. He gave me and the certainty that nobody cares of me. When we made the decision to I help myself. The wheels of the head began to move and to find an invisible enemy for us all, but extremely dangerous. I wish you will give you mind enough to understand those set out below. I will try to do the information more easily understood. Most beautiful, instead, may not to do it. It is cruel and blunt fact. Can we leave the wisest of this story?

In this book there are direct links in the website. They are to make the access as quickly to the latest information. Still there can give you explanations more detailed about how you can protect.

Chapter 1: Soap Bubbles

[<back to content>](#)

There is a huge problem in the world and this is noticed more loudly on the Internet. Everyone is talking no one is listening. From the complex, entering into the far too many details and are looking for explanations as shocking. Most of the times the real explanations, true, are the simple and logical. There must be a two-way connection between cause and effect. This is the only way in which the explanation of a phenomenon may be the correct value. What do not survive an analysis the causal relationship cannot be called scientific explanation or is the phenomenon is incomplete explained. Must not be something that I have not yet discovered.

Also, must be given to the imported details as required. But this important must not lose sight of the entire assembly. We must not lose in the details. Because of them we can lose the perspective. In that moment we put horse glasses and we can no longer get rid of that information tunnel.

I am not attempting in any way or influence you to give me right. Please seconded by the prejudices and start to think your mind. Do not take the unverified theories on the Internet and do the partisan of any causes or ideas. Be with yourself and weigh what is best for you. In fact his best friend for your body is you. Who would think for you and whom you trust? In advertising or politicians? I think not. All you are your friend most trusted. I hope that you will not be fooled themselves.

Caution! There is a technique of intoxication of the information society for all the naive and back to content in the world. Expose a theory assumption and sufficiently plausible but on which you do not verify you can by no means simple. You will need to call at an

institute for research, and this call to the cost of a huge pile of money. Or you must have the apparatus most sophisticated that you can to prove, and this cost. In the following I shall expose a content logic causally and I will try to give you and instruments or the methods by which you can check you alone what I say. Must not take my word for it." **Check yourself! Why do you trust those, somewhere on the Internet and you do not trust your own mind? Because it comes from someone who has? If this someone is malicious or just stupid? Have you ever put this question? It would be appropriate to do so. An entire system is based on this technique of self-deception. A day will come when all this system based on the lie, will shatter that a castle of cards. Then what will you do?**

There are also very many methods to cheat. I will not explain them now. I will take a few inside the card. Something else should be but to emphasize here, at the beginning of exposure. Misinformation can do anything if this is not the propagated path of people an unsuspecting public. They didn't do to blame. Are only manipulated. They are in good faith. Would like to help her. Instead propagate the lies of the lives of others. For this reason you please do not listed no information which you can check yourself. Let those who have the methods to prove what claims to be in charge of the propagation of ideas. Those who say they have the truth and the methods and means to show him the world. They know very well what he has to say. They demonstrate doesn't say. The statements without demonstration, without a proof palpable through your senses are worth nothing. The Internet is full of statements. Too few demonstrations. This book is a demonstration by several ways of all claims from within her. So please do not more post anything of what you cannot demonstrate. In this way to stop misinformation to act. Maybe we will make it

difficult to find out the truth by it. This can be done. But we will surely stop the propagation of lies. I am a person who finds out quickly the truth. With time and you will be trained to protect you against the lie. You will form a system of thought which will act instinctively against sickened and big liars. This is winning with experience. In the same way and dignity and solidity personal. These are the things for which you train and fight back. Win, you are not born with them.

It is time to explain the title and to clarify why you are sick, who caught and how to make you do in optimal conditions. How to repair what has been broken in the body. Soap Bubbles are the title of those exposures that will generate discussion around the world.

What are the flasks of soap in my opinion?

[<back to content>](#)

The flasks (bubbles) of soap are individual informational universe created around each person. The hand of each individual is surrounded like a soap balloon, a certain limited sphere of knowledge. These "soap bubbles are smaller or bigger depending on many factors. One of the most important is the education received from all our educators, starting with parents. Another factor that determines the expansion of the "flask" is our thirst of knowledge. Our thirst for knowledge has brought us to agree to be sick. Are persons who have fully exploited our desire of progress they had brought us to agree to be desperate to find a cure for our skin. Catalog desperately a cure to some signs that appear on the skin nostra, without to understand that those signs are in fact a defense reaction to the action of factors harmful. The same happens with all our body. I went to some signs that appear on the skin and I have come to find very many "disease" related to the same question.

Why we are sick? What and who is responsible for this? How to make you get rid of those factors which are harmful to the country? Carefully read until the end to understand. If you do not understand ask for help from your teachers in high school or of the faculty. People in which you have confidence. If there is no other way you are not the answer and I are available to you with explanations on the additional information on which ask them to your email address : myskin@iso.ro .

Have the confidence that they know how to explain the meaning of all. From simple housewife to scientists can explain exactly what was happening.

Consequently, to expose the facts.

There is a skin disease the mysterious, appeared in the world. I from her I went away and I discovered many other diseases. Some call Morgellons. Until now nobody knows a cure effectively for her. The so called mystery is with the fact that they had found until now causation of the disease, the cause for which we get sick.

Why?

For Morgellons is not a skin disease. Morgellons is not a psychic disease. Morgellons is not a disease organic matter. Morgellons is not a contagious disease. Morgellons is not an infectious disease. Morgellons is not a mushroom. Morgellons is not organic farming. Morgellons is not a disease caused by chemicals or heavy metals. Morgellons is not poisoning with food from genetically modified organisms. **Morgellons is not a sickness.**

But what is Morgellons?

[<back to content>](#)

It is important to read very carefully the following. Every word is true. Read and try to understand the explanations. The only way you will be able to retrieve the normal aspect of the skin and/or health lost. The only

way you will not be more exposed to the most dangerous factors which have ever existed in the vicinity of you. Many will not accept these explanations. Is the option. This is the truth and bring evidence that the evolution of the skin in the case of my. Simple removal of nuisances I returned to the health of the skin. I have not got a medicine or food supplement. I have kept the diet and all the culinary habits. I behaved very normal.

Morgellons is a normal reaction of the human body to some factors extremely dangerous. Morgellons is a warning sent by our body. Morgellons is that an allergic reaction of the body by which it shows us a danger. Warns us that the colored beads and cheap which have destroyed the American company pre-Columbian are not good at all. For these reasons, from now on, I will make reference to the Morgellons as a reaction because it is not a disease, syndrome or something else. Morgellons is like a sort of allergy to something that mind. In exchange, behind her hide a merciless disease and oppressive reality of dangerous. In our country has started to make victims. What is happening in other countries? You can only say that our country is for the last eight up to twelve years. We are lucky!?

I found those factors which are harmful and I removed. After those I began to recover my health lost. After 90 days after the removal of the case, my skin remake itself day by day. This has quietly, proving that the hypothesis from which I left I was quite confirmed. Then I found the real guilty of injuries occurring on my skin. Is truly a factor extremely harmful and confirmed, studies serious forces that are the generator of cancer. I had and good luck and the necessary knowledge in order to observe and interpret correctly some experimental results. Now he has been more than a year of this date and my body still eliminates the remains of his fight with the enemy of the invisible. I am saying this to emphasize as it is dangerous to continue to be exposed to those

factors which are harmful to which I will reveal in the following.

The real disease is not limited to the skin but attack any living tissue. The doctors from all over the world are overcome. Those who read on the Internet the stuffiest explanations. The aliens, conspiracies, chemical agents, but by the condensation from the Aircraft Engines, organisms or genetically modified plants up to the one who has helped to "design" disease. I read them all. True cause of this reaction is true and presence near us. Is located in the immediate vicinity of each one of us.

Do you know that you pay to have Morgellons?

[<back to content>](#)

Yes pay to have Morgellons! Paid for it to be in the vicinity of the most harmful factors which have ever been. Yes, and paid for a very long time! Because of this, of time long when you prepay, that you are under the action of the nuisances the body has created a sort of immunity to what attack and now react very quickly to those factors.

Yes. You pay to have Morgellons. You are tempted to ensure that on a voluntary basis to expose yourself to the most dangerous factors which have existed and in the universe. I know what I say. See the evidence below in the book.

We live in a system of values and more corrupted. Money is the sole purpose of many people. I do not have been trained so. It is true that we have lived in socialism and I was educated in this company. I had a scale of values determined by the performance. Produced human values more than now. They were and waste materials as in any human activity but these errors of nature were removed from the system. Capitalism, communism, slavery, feudalism, common primitive are some names given the same companies. Nothing has changed at least

7000 years on the Earth. This is because the man has not changed. It is the same being eager to riches and power, now, as a long time ago. All these forms of society have contributed to the all-time greats only a few will not to see the obvious. The only thing that has changed is the speed at which the information.

Can at a given moment we achieve all that we are exactly the same animals which the fight for survival that now thousands of years. I changed many around us, but we have not at all changed. Only a normal society could do this. Now we have proved that neither the capitalism is not a normal society. Of all the interrelation that exists in this world, only trade is the relationship that survives. Love and compassion, responsibility does not mean anything in front of the almighty money.

I am telling you this, which do not have a link appearance to the reaction of the Morgellons, as there are a state bodies and international organizations which should protect us from these factors harmful. They did not because they are populated with people unprepared or corrupt in all states. No Member is no exception, all state institutions, international and the world are populated with people unprepared and/or corrupt. This, in translation free, means that some sun stupid, others are cunning and some others are fools who think they are smart. There are probably smart people or cautious among them.

These enunciations are for you to realize that there is a guilty for all this mess the sun wheel. This mainly responsible is ignorance. In addition there are a few guilty which fall within the human side of our: greed, educational system based on the principles of no memory of thinking, the rush after sensational looking for its causal, the temptation of the new regardless of the consequences, fashion, etc.

The effect of the tunnel. How is manifested and what he is dangerous

[<back to content>](#)

In the first sentences I used the phrase informational tunnel and I thought for a moment that it should be explained. See! I thought exactly like in my bubble of soap without take into account that everyone else could not to understand.

The effect of the tunnel, the effect of the microscope, the effect of the tube or horse glasses there are four names for the same phenomenon psychologically. Focusing on the details, like with his mouth lit tunnel, field of the lighted by microscope . or at the end of the tube we have that in the bubble soap, a limited area of information to which we have access. In no case can we explain something from outside the bright area on the basis of the information in the area bright.

For example, we don't know the eye color of a person, if we take a closer look, through a tube to her hand. We lack of information on the basis of which we can give an answer correctly. We need to make a few steps back to see and the area of the head or to give up to the tube and take a look at the person in its entirety. It's the same things with science. If you take a closer look at the microscope to remove from the start a whole series of elements on the basis of which you can reach a conclusion correct. Must be regarded the phenomenon from the whole by component, to assembly to detail, not the other way around. The details may determine never sure the appearance and behavior of the whole than when they are enough. Also and vice versa is valid this assertion. Neither the entire does not the cause depended on the behavior of a part of him. Things are extremely complex.

In vain do we have the equipment performance. Microscopes of new generation do nothing but to create

a fog in our Head. See things we could not explain in forms unfamiliar. Things amplified, but we fail to see the order of them. Do we not see what determines the emergence of such things. Do not feel the mechanism for the production of this suffering and implicitly do not know where to act, in place of the mechanism to lock the propagation of the suffering and to other people dear to us.

The communication

[<back to content>](#)

The communication shall not you only technique. Communication is an action of the transfer of knowledge. This action takes place between the two entities granted. This term of the technique is the only within exactly for the definition of the communication. Without this grant, there has been no more transfer of knowledge, and therefore may not take place communication.

Let us things simpler. Suppose that in this world there are two people very bright and much trained. Each is recognized in the country as being a very intelligent, very education and a very good teacher. may make people to obey him with pleasure. Each has increased generations of students who have gone on with the knowledge received from these false teachers. In a word we have two people see anything extraordinary in them.

Wait for the two in the same room. We see that the two though are very familiar with the other people, not communicating. What happens? Simple!

These people are not pay. These people do not speak the same language. One speaks of China and the other speaks Romanian. As the two to be able to understand there must be a way to be able to discuss. Must find a common denominator. The Solution?

Here there are several variants. Times daily to learn how to speak Romanian. This is a variant. Times the novel learn to speak in Chinese. This is another

variant. Both times began to learn English. Another variant through which reach that both to know a language which should be the common denominator of communication. This means the first step toward the granting of the discussion. The establishment of a common channel by which can be transfer information understood by both partners of the discussion.

If the things would be as simple as that I would be the happiest person in the world.

This award is more complicated than the knowledge of a common language. In the transfer of information can be done by a simple question. Not to be made under a chat between two geese. In the army there is a process that must be confirmed that a message has correctly reached the ears of a subordinate. It is bound to repeat the message. In this way it is confirmed that the message sent to the sensor has reached the subordinate in the terms on which it was sent. This eliminates errors in the transmission of the message. Does not eliminate not errors in the understanding of the latter. So that the message would be understood, a good master to make the subordinate to carry out the order as he understood, and if the employee performs poorly, corrected.

An unusual happening is I had in the Capital Budapest Hungary, another member in Europe. All happens to us that we get separated by a large city on which do not acquainted with him. We stopped our cars to ask what the way to the Vienna is. I have been playing a gentleman in the elderly. With calm imperturbable explained to us as we reach on the way good. Then took place the following conversation:

- I understand! Exclaimed my friend... Thank you.
The question, language stranger to me, but it is known by my friend.

"No, etc., not, etc., no,... Don't rush. Repeat what I said, said the elderly person whom I have asked for help.

- ...?

Elderly person, do not know who it was, had a safe method for the award with the other person. We both of you, my friend and I, we remained dumb. The man not only has sent a signal. The man wanted to know if I got it correctly, and more, if the information received will be useful. That we will find the way to the Vienna Convention without the asking for the second time. That, these things transmitted, we have entered into and have remained there. Remarkable person.

This was indeed a communication. It was only then that I realized what important is the communication. The communication, though very many speak about it, very few times happens to exist. Everyone loves to brag about discussions. The discussions there are many, but they are not important at all at whatever level it wore, if in the discussion does not take place and the communication of the granted. It is only then that question is a question of importance. It was only in that moment the two sides resonate on the same frequency. It was only in that moment the two speak the same language. It is only then that our conversation is not a waste of time.

Very many people have recited poems. Many people I hate poetry.

Why?

To ensure that the school some of the teachers of the idiots, they have to repeat that the good-for-nothings a poem more or less, silly. Only later in the course of time you realize that in the poem there is a message. That poetry is a codification of thoughts and emotions someone. Our teachers are some Morons Group. In place to make us to repeat that the good-for-nothings, we should make to think the poem. To see the beauty of the

message. It is not important to begin with. It is more important to understand. It is only then that you find the path to another brain. You can find the path to the thinking someone. It is only then that you get to be human. Then open all the paths to the real sky.

And, etc. the way the sky. This morning I past a church. In holding religious service. It, the monkeys they who go to every day at the church, I understand the divine messages? Or go to listen to " declaiming " in the Bible and the Gospel? They understand what the priest says? I say the words of the priest? I understand the introduction?

- "wisdom. Let us consider. Peace of all."

How establish communication?

Nice words were said people. It has anyone understood? I think that there are very few. Why? For that action is an important too low establishing communication. Simple conversation is not enough for effective communications. Exposure in front of an audience is even faultier from the point of view of the transfer of knowledge. Many they are interested in hardly what is exposed. They are there from quite other reasons. Lots of people are going to meetings of this kind to socialize. What he says on the scene, is much too trivial for them. Because of this establishment of the communication is an essential thing in the transmission of information. Only those teachers who have managed to get to know the students have managed to teach them efficiently. To be a teacher is a vocation and an art at the same time. The same happens with this book. It is an attempt to communicate with an interlocutor unknown. If the author does not make an effort to lower the information bar at the average toward the bottom of the knowledge of the individual has written a book that he will read alone or in the best case you will read only persons approved. But this book is addressed to persons

miscellaneous. These persons are not educated in the scientific field. I am, but cannot write a boring treaty of scientists to gather dust in the libraries. I was taken over by a pseudo scholar. Have a preparation in the analytical chemistry. A man trained personnel. He sent a message via Facebook. He said that will not be visible at all that I have any kind of technical training. I think that praised me in fact. If this is not feel this means that we have been able to keep under control the scientist of me and I made many steps by the serious communication. I do like to talk and understand the only me what I say. I started to say few scientists and what they did and to demonstrate that I know very well not only the formulas but and what they mean those formulas and how it is to be noticed in our daily life. Anyway he did not understand anything. It was jammed between the chemical compounds and could not release the mind to think the existence of something else in this world at least as important as the subject. After a while I suggested to read no more Because not everything on this world is chemistry. In exchange, everything on this world is electromagnetism and energy. It did not say so. It demonstrates the Einstein by the theory of relativity and the famous to the formula: $E=mc^2$. I do not have time to sit in the discussions with all the fool. But in order to make me understand I must go downstairs from the high spheres of Science at the level of the profane man. He does not have the knowledge required to understand me." Then I must I pattern language in such a way that a person who is not the specialty to understand me." I have not succeeded in u everything. There are some aspects which cannot be described in simple language. But I will endeavor to get in your brain in a manner as I simple. But also you have to do a minimum of effort to try to self trained in that field. Use of dangerous tools in addition to you. Nor do you read leaflets. You don't know how it works. You know very well how to use. Use them

and most of the times never harmed in their use over the limit of endurance of your body. Will fight and will amazed how a device is observed so dangerous. This does not it would never have happened if those jerks of polluters would it be instructed how to use that device and what risks involves its operation. Therefore the use of a device and the operating principles of this device are things totally different. If you only knew that the energy emitted by such an observed device converts it into a small grenade solenoid valve that spreads diseases more secure than do viruses and bacteria maybe you be impossible from the enthusiasm with which you contaminated on the VOI, the others, the entire planet. But here is not only about the communication. Here is about and about the greed of those who will sell the poison. Most of the times this information is presented denatured, written with small letters or simply omitted from the listing particulars of the appliances. We skip over the fact that 90 % of you never even have ever read leaflets. 90 % of the ones who have read did not allow them to understand. Probably 1 % of those who possess such devices, and this percentage is of an exaggerated optimism, I know very well what the bomb solenoid valve and have bought. It gives the efficiency of the transmission of the information.

The respect for your time

[<back to content>](#)

Before anything else I must inform you that I am a person who has a particular reverence for time. During all is precious. For the time being, it is only one dimension irreversible and cannot be given back. So I am not going to wasting their time, nor mine, nor of you and the others. In other words, I am not going to load the memory with information useless. I will not write tones of waste. Has got more complicated very loudly a miracle of nature... life. Let the life to be!" I am going to write a

little and concise. I would give only the essential explanations. Who has the brain will receive the information correctly and will assimilate quickly. Who does not have the brain, I, I am not where to give him!

The writing of this Article has a reason direct. I caught a mysterious disease to the skin. The first impulse, most natural, was to go and see a specialist doctor in skin diseases. It has not helped me with nothing. I could not find a treatment. When I saw that the doctor does not can help me I started to search through libraries and on the Internet. We have seen that are not the only one with such problems of the skin in the world. I have read many articles and I could not find nothing else to do, coherent, logic and useful. All items are philosophers pointless or fancies of brains rested.

Many will not believe what will read in the following paragraphs. Is the option. For those who do not believe they will tell them that the two types of people do not support on this world: liars and rubbish. If of liars you can occur, stupid only May God protect us. Will not believe... I couldn't care less, not much I can be compassion for her. If you do neither support nor liars I have formed a system of thought which identifies impostors immediately. All for the same reasons do not lie never. Not wasting time limited my brain with lies which in any case it is discovered sooner or later. Also may not waste their time with each naive. I will try to explain the facts as they are and to offer the possibility that they should be checked. Who will understand is recovered who will not understand will continue to look for drugs for something that cannot be cured with drugs.

An "uninspiring", in this big world, she told me that they make a disservice very large Morgellons community. **STOP! There is no Community Morgellons. We cannot return in the Middle Ages when leprosies were isolated from the**

other men because they were sick and nobody knew its cause their illness. In addition those who have Morgellons reaction are not sick. Why do we have to otherwise. Only are more sensitive than others. Maybe we should thank them! Cannot be fascists!

If you have the impression of superficiality would not be good for you to pass. I am working in this book of two years. I searched before another four years a cure for my skin. Therefore a total of six years. What we have discovered I was appalled. It may be that this book should be read by all the patients in the world. The book is sold from a single reason. By means of this book I want to collect the funds to stop genocide worldwide. There are big words. It is accurate underlying truth and to see that they are aware with whom I have to give you an example of the Bible. Everybody knows about the legend with David and an old acquaintance. Well, I'm ant under the foot of David and I want to wrestle with an old acquaintance. Through the sale of the book may be increased. This way I can balance of power. Do not be afraid. I do not want to get myself a rich man. I don't give a damn about wealth or property. I have long exceeded these ideals shallow. The money will pay the book will go only toward this purpose declared. I have to go on living. I do not want money from the poor. There are people whom I made gift book. I have taught and how to avoid these factors harmful. I have received and donations significant. All these funds are and will be subordinated to the same goal, to stop genocide worldwide. Stopping the human suffering and survival on this planet." None of these are not big words. The pollution of this invisible threatened us on us, animals and insects, plants and also result in heating of the bodies on which the works. It has a word to say in global warming. It is still not too late.

I will defeat. You know why? Because I have my side science. Science is the only tool that can overcome this "an old acquaintance modern". I also know that these murderers jerks may not be hide using science. The science does not help them. Do not have access to it. They can no longer hide long this pollution. It is already acting sufficiently aggressive. Already such pollution creates victims. Are dying because of pollution.

Chapter 2: Morgellons has no cure! Morgellons is a cure!

[<back to content>](#)

A normal reaction of rejection of harmful factors!

You can shave, but there is nothing of laughter! We are threatened by a danger very high. In the body of all people is going on a disaster. To most is not visible. We are all affected to a lesser extent or higher by pollution by factors especially harmful for which we are not prepared physically and especially the educational purposes. Educational say because these factors are invisible and if are invisible don't realize how dangerous can be. Apply the ostrich strategy? What do we not see does not exist."

What do we not see working against us. We are devouring each cell. We are destroyed by vii from the inside by an external factor of which we can dispense with and if we know better we can occur. There is no limit in the space of action of this trash. Nothing in our body no one can stop. Any of us is immune to the action of this trash.

At the same time I want to tell you something you will freeze the smile on his lips. Something that I personally checked that it is so. What we have discovered the EU is the fact that this pollution is the mother of all diseases. From simple colds, fattening excessive, diabetes to death, it dirt can cause all diseases organic or can simulate any other viral disease or infection. Is truly a nuisance.

Because of this the doctors from all over the world are overcome. They invent new diseases to name the different stages of the same disease. I discovered "disease" that Lyme, Morgellons, Fibromyalgia, autoimmune diseases, certain forms of cancer, certain

forms of diabetes, blindness or loosening of sight are in fact effects of this pollution and different stages of a disease drunkenness developed as a result of exposure to it pollution we realized that we are in a huge danger. God gave me the brains to use it, not me to mock him. Using that I made the logical correlations. I found causal chain relations of the disease. The discovery of causation has led, in a direct way, to find a treatment for my skin. I found exactly the place from where to act to interrupt the causal link which made me to suffer. Now things have a logical explanation direct. By removing the cause of the disease, skin has started to heal. Two-way relationship between cause and effect is obvious. Now things for me have a scientific explanation and logic. The disease is no longer mysterious. I did! See photo gallery on the line see the evolution of at specific time intervals.

You are still in a huge danger. Somebody placed mean of the human race in the form of the current intelligence. They have no need for people that cannot think. They need performers obedient of the program, their zombies where you are the raw material. This danger dressed two major aspects:

*The first and most important is that of the misinformation constant and sharp our limiting access to a of quality education. We no longer teachers to be motivated to teach us. No longer have the passion. They are no longer pay properly. Only the polish is important, the essence of the no longer has any kind of value. Why they had to get over 12 years to be the cause of the illness. This means that the system is ill. Nobody had any motivation to find what we fall ill until now? In this case we are in a as well as deep!

*The second aspect is the physical, attack directly on the human being. The gradual abolition of the man on the surface of the planet. The attack, since it is about an attack that bears the characteristics

of genocide, is directed to the top of the society. Deliberately or not, is an attack on those who have a certain status material and is an attack in the long term with unexpected effects yet. I tend to believe that is an attack willful, valves and I wonder how on earth they found such a deadly weapon that would want to be you have it all the time with you, to be harmful in some places (LLC), to attack the valves a certain group of people or to make them to think about their own health not to general issues, normal of humanity. Have that working on the planet, what are we doing foolish things?

Over these problems it is necessary to add some smoke bombs to cover the true cause and to give the impression the dupes that they care about someone from them. They don't care! Believe me. They have started making all sorts of organizations and foundations (they say that the non-profit) where pseudo scientists are trying to find explanations of fantasy in to find a cure for a disease called the mysterious MORGELLONS!... Shit! They gave it to him and name!? I feel the urge to laugh at to guess the heart in me. Oops!... I do not want to die and ... If you would not be so tragic and dangerous even that I laugh. The disease is very real and must be treated with due respect. The people even suffer and are becoming more panic so that the authorities in the whole world are more concerned about the gap at the top of the political hierarchy than the lives of those who put them there. More serious would be to know of this disease and even to a cause. Why not? The premises and logic justifies us to believe such a thing. This is the beauty of my life! We are so many because we do not know when the birth of a Genghis-Han, Hitler, Stalin, Pop-Pot, Mao or Ceausescu. The world population must be reduced to be comfortable for each planet, while others have brought to the stage of not thinking working tools,

just simple performers. Where the result of their cynicism, until which limits. Limits?

Their cynicism has no limits!

Who can help us?

[<back to content>](#)

The danger is that the disease occurs not only on the skin but also inside the body causing all sorts of cancers, and internal malfunctioning. The disease has no boundaries or limits of action. Do not rush to eat chemotherapy. The doctors from all over the world are not prepared for this disease. If the disease you have the chance to get rid of chemotherapy are dying to be sure! The treatment is successful, but unfortunately the patient died. A success total! No!?! This disease cannot be treated by the doctors. Do not have the necessary training. Rather an engineer would be able to help you much more than any doctor. This is because of the fact that a systems engineer electrical profile well known factors harmful.

In a report seen on a TV station in Romania a doctor ignorant cut the limbs of children, because he has not found the cause of the disease. I wonder whether this has been looking for? . Those children had the same kind of injury as those that appeared on my skin. In my case proved to be reversible and repairable. Understand the causality between harmful factors and the start of the reaction, or has made that the doctors of the Middle Ages which for any disease I gloried the blood of the body. Does this company does not want to evolve? Please from all my soul:

Think... does not hurt!

[<back to content>](#)

The symptoms of the disease are not generally recognized and do not have a rigorous classification. This is normal as long as each person affected is a single

entity. We can say that it is also very real. The disease is influenced very much and by external factors of the patient and its resistance. The degree of vulnerability of the body is also a determining factor in the occurrence or masking of the disease. Many patients have begun to treat themselves disease with no greater success or less. Is my case. Unlike many others I have identified the cause and we removed it. Any treatment does not give fruits as long as the real cause of the disease is active and causes damage to continuously. All treatments are palliative as long as the real cause is not removed. Money and precious time lost. There are some frauds that have found a cure of colloidal silver and asked for a lot of money for such treatment. They are released, some people who live with the suffering of others. Now that I know forces what is the reaction of the Morgellons I can tell you that the disease which is caused by the factors that cause the reaction of the Morgellons has no cure. Only one known cure is to extract the human body from the toxic effects caused by those factors which are harmful and helping the body to heal.

Do not be nervous and anxious! All the talk of harmful factors that cause Morgellons reaction. At the right time I will reveal what are those factors harmful. For the time being I tell you that are invisible, are known for quite a long time as harmful, but not as it. You must understand very well what will expose to. You stand no other chance of survival than understanding the phenomena. So please to have patience and read everything. If you go over the explanations you have a great chance to make fun of me, but in fact you will mock his own person. Read everything and you will be informed as to get rid of this hell. Not only that! Try to understand what read. It is not even within the reach of everyone to understand the exposed. If you do not understand ask for help from the specialists, they can help, if they will understand in their turn.

We have identified the cause of the sickness. The symptoms generated by this are common to several patients. They are:

- *the forms appear slight nausea and vomiting;
- *appears similar mouth sunstrokes;
- *a headache muscle or organs;
- *red dots similar to acne;
- *skin rash or wounds which may cause itchiness intense. These rashes with aspect of the cave to the ceiling. Like a severe burns that happened under your skin. Many are of the form elliptical pattern. As though an invisible cylinder v-would have passed through the skin. Like an arrow cloak;
- *sensations the rating of something on and under the skin, comparable with insects in motion, stinging, or bites;
- *fibers, yarn or fibrous materials arts in and on the skin. Sometimes they may have the appearance of crystals;
- *severe fatigue;
- *difficulties of the concentration;
- *losses of memory in the short term;
- *a loss of and the precision of the handling of objects;
- *hair and whitening of ingrown hairs;
- *the fall of the teeth.

Please read them and will stop here. We can say how to fight a lot of organizations, to write a tone of waste ...blah, blah and ... blah.

As I have said, the loss of time.

However, should we highlight what may cause these factors of sickness, in order not to have the path of the recovery locked by a moron by or on the order of a physician who wishes to make us last room, beautifully lined with silk and sufficiently narrow to be personal and single-use only.

Which are the effects of these harmful factors?

- *sensation of temperature as though you cold or the flu;
- *stimulating the secretion of the mucous membranes, in particular the nose and sinuses area, confused with sinusitis;
- *diabetes;
- * decompensate heart;
- *loss of vision;
- *skin cancer by altering the information at the level of the core motor;
- * Aneurysms by blocking of the arteries in the area of the skull;
- *ovarian cancer in women due to the position of the power from the female ovary;
- *cancer in brain;
- *cancer of the lymph;
- *cancer of the bone marrow;
- *lung cancer;
- *leukemia;
- *dysfunctional character of the transmission of the information in the body;
- *Power Loss of muscle and the coordination of the movements;
- *stimulating the occurrence intestinal and stomach, causing a continuous sensations of hunger;
- *obesity without eating the food;
- *to a long exposure the reaction of the organism can be so severe that it can be confused with other diseases serious organic. All of these depending on the area in which these factors operating;
- *death.

Is the mother of all diseases. From simple coldly at the terrible cancer all known diseases may be generated by these factors harmful.

The disease is not new, is not the mysterious, you just need to know yourself and you know how to defend yourself from it. The mystery does not exist, but instead there is a vast ocean of ignorance and/or ill faith.

Why not have found it others up now? ...

<back to content>

The problem is that ... They found in 1934 but not as this. But scientists with diploma and horse glasses cannot see obvious than when it is too late.

It would be a few possible answers to the previous question:

- *Do not seek it. Morgellons is not caused by a virus or bacterium, chemical substance or nuclear element and is not a so-called autoimmune disease;

- *Not a contagious disease, but is rife to scale planetary drive (each topic will be sick separately);

- *This response time is not obvious. It occurs in time, as a consequence of the accumulation of energy, to the level of cells. For example to me has appeared after 16 years of exposure to the factors dangerous. In such a period of time it is difficult to do association correct. So many events have occurred in this period that has been difficult to distinguish between real question;

- *the signs on the skin appear randomly in time and they could be assigned to a specific sources;

- *doctors do not have the necessary training to make the necessary correlations a discoveries, especially because they explanation is far in excess of their capacity of understanding. Are simply not trained in this field. Can the military doctors could have an opinion useful, but they did not take care of the civilian population (This does not exclude the possibility that they may not have no idea about the they taking into account that have not given

any explanation of a hallucinations American soldiers who fought in Iraq and Afghanistan. The same factors causing hallucinating that those who causes damage to the skin. There acts directly on the nerve cells in the brain.) ;

*Looking for something that does not is palpable through the normal senses;

You *do not think causally, a historian and relational, in a word "since I";

*are not able to see something from under the nose of them;

You *do not have been fight with this disease and are not motivated to find;

*tunnel effect (explained above). Are slaves by microscope, they saw an enlarged picture and fell on his back and so have remained;

*will not to find. It is a world campaign of the coverage of this plagues the modern world. Some people huge win by the fact that we intoxicate on all that they have driven people and probably paid to create confusion. They are a very good thing as proof that all health systems on the entire planet that I do not find a cure for at least 12 years with all their preparation and with all equipment that are provided.

*a huge fraud at the level of all systems of health insurance. Taking into account that must be searched for the routing of the money in any action being, I can tell you that shall be chargeable huge amounts, \$2000 per piece for genetic analyzes useless. Through them you are told that you are people and that you are fragile. Can someone to repair a genetic fault? No one. Has a pointless analysis? None other than to transfer some money out of the pockets of the health insurance fund in the pocket of certain doctors. In addition 100 % of Earth's population is faulty genetically modified. So

we have evolved. We improve continuously. Who pays for these amounts shall be thinking about involving these analyzes useless.

Most sad would be that only the last two statements may be true. In any case at least one of these is true. This would mean that they are preparing for a long time the greatest crime in the history of mankind. That the importance and effects is very close to the extinction of the dinosaurs with the exception of that when this has been caused by external factors independent of the will of the dinosaurs. Now is caused by greed in conjunction with the technical ignorance of certain people and the corruption or ignorance of the state and of the world that should defend us.

Keep in mind the date 2014.05.14 (yyyy.mm.dd) "the healing day" (day healing). That was the beginning of my healing and the beginning of the fight against greed of an entire class of stupid assholes. They started to discontent me from 1992. And now I have the traces on the body from those attacks. For six years I gave up smoking and I began to have rashes on the skin, but nicotine was to blame, she merely concealed the true cause. Now they have gone too far and we also abused a bit and I am. No longer have any shame and will be very hard to stop. The solution is to take our each measures of provident and should begin to act lucid and coherent. If it will be an answer as possible, individually but planetary proportions, will not be able to cope with and will crack. Anyway will try something else, but then we will be prepared. I swore that I will not have peace until those people greedy what they have caused such suffering will pay. A few years ago I gave up smoking and I have been to the doctor dermatologist because I had some strange eruptions on the skin, but has helped me at all this. They are overwhelmed and dubbed of their sales system health (more than drugs and sterile theories than health). For them, the oath of Hippocrates

said no longer has even the value of the paper on which it is printed. The only entity that ii move is money, very much money. I tried everything I knew antiviral antibiotics, creams, various chemical substances, but not until we have eliminated true cause there is nothing remarkable in the course of the disease. I was lucky enough to have access to drugs because my wife and my daughter are pharmacists. It has not helped any kind of medicine. But... at some discussions with a friend a revelation, I discovered the real cause of the disease. As soon as I found it and we have eliminated it, I saw significant developments in the appearance of the backrest and the reconstruction of the tissues affected. It is only then that we realized the danger, the importance and the gravity of the situation. One contemptuous look, in their rush for profit, has no scruples and is able to put an end to the life-saving appliances on the Earth. In only three months after the removal of the cause of my skin healed. The correlation between cause and effect is as obvious. I am sure that, until the scientists will confirm or overturn and will quarrel needlessly on dogmas and other fiscal relaxation until then you will be dead. I for one am I going to die of natural death, not caused by artificial causes of which I can dispensation.

When was this article I sought data about the disease. We have seen that most are scared the Italians and the Germans, not to the Americans. This is about the change the data of the problem. I think that some Americans are at the root of dirt on the planet. Then I made an association of factors which I was terrified. I want a thing to be very clear. There are anti-American. America is a country as any of the world. They may have too much freedom and when some people choose to be stupid assholes. Anyway the concentration of fools is the same as in any other country. In addition there they emigrated all those who have set up the cream of other countries. The Italians, the Russians, the Germans and

even the Romanian of mine are in the American continent may to disregard all and would not be correctly. Some of them are a series of nonsense and for this you must not do we blame on all. As a whole is a great nation.

*What they did the Americans still new? ... They furnish the consumption of marijuana in some states.

*When there were my symptoms? ... When I left by the obsolescent!

*substances which they hide the effects of the causes of discovered by me? ... Yes, one is nicotine and other alkaloids what are in the leaves from the Indian Hemp (Marijuana).

*So what did the Americans? ... As usually, they covered a as well as with a leaf. Have not discovered because of the "illness" and have decided that it would be best that the world not to notice the incompetence. Therefore better some drug ill than angry. At least in the state of euphoria date of drug no longer care;

*This shows that the authorities and the American doctors, whenever I know what causes this disease and the effects on the population, whenever they own anaesthetize even your inhabitants, ii factories and mind goes numb them not to care. The resultant conclusion: either are criminals, times are Morons Group.

*In addition ordinary Americans have no idea that they live in a dictatorship and much more powerful than we lived we ever. What receives an American, from the point of view of information, is extremely well censored. If it is a case of cats and dogs or stupid on YouTube or Google you get up to the last house in the US, but if it is a case of serious information and which to provoke the Americans think you will censorship. You are not allowed to

simply get to their brains. They must also be in a position to control them the whole system of thought. You killed the one on which he called Ceausescu on exactly the same attempts to control the thinking of the Romanians. You are not quite the same story. I am sorry for the great American nation. Honestly! (like a small brackets, are and cynical. Google does not mean anything but goggle means horse glasses! I.e.: "Look, but only what they want from us! You are free, but we keep the chain". YouTube - tube, your tube not to look at the other somewhere. It was too much for to tell them the matrix)

I healed, not totally because I still cysts from the attack of the disease and the areas still active, it is obvious that are in the process of recovery with real progress. This to more than one year after the cause has been eliminated. Eliminating the cause shall be the sole element changed in my side, and I have the same diet, of the same substance with which we treat me and before but without any effect. The body is cured slowly to the rhythm of the natural replacement of the affected cells, but is curable sure. Will take probably a year up to the total healing. It is difficult enough to remove the garbage collected in the body in the many years of irresponsibility.

Chapter 3: How will you heal you?

[<back to content>](#)

Carefully READ AND DO NOT SKIP ANYTHING UNTIL THE END OF THIS ARTICLE. If you treat superficial problem you will not remove the cause and the disease will continue to grind until your

body going to crack. What will make your skin is ill electromagnetic radiation from cell phones and wireless devices. The same frequency which makes the meat to be cooking in the microwave oven will make your skin to react so bad. Why would you think that near the cell phone electromagnetic waves of a frequency 2.4GHz behave otherwise than in a microwave oven where they have the same frequency, 2.4GHz? In Safe mode you do not have any argument to believe that what make the meat to be fry in a microwave oven is harmless if it is used in the cell phone! I think that you are not so naive as to think that are harmless!

The most dangerous are, however, Wi-Fi routers and communication on the Wi-Fi. The frequency range is between 2.4GHz and 5,9GHz which implies the waves of energy on a much larger scale and the second and most important parameter: they function usually permanently. The exposure time is a determining factor in the appearance of the disease.

On a discussion forum on "disease" Morgellons someone wondered very seriously:

What is the connection between us that we Morgellons?

[<back to content>](#)

The question is very unsuitable. The only thing that we have common is this world scourge electromagnetic radiation got out of control. It is exactly this question made me to find the real cause. It was the only element of the remaining connection after I got so many medications that could no longer be nothing alive on me.

Arguments:

You *do not breathe the same air because we live at a distance from one another so we cannot take the germs, pollutants or poisons in the air;

*We live far away some of the other and cannot be contaminated with heavy metals or other pollutants. Has not known any pollution which should be on such a scale. Until now, because this reaction is a response to an electromagnetic pollution;

*we cannot be foolish all, to have the same symptoms without to interact with each other. Something must act on our brain in the US or in Canada, in Europe, Asia, and Africa. That something is acting in the same way wherever you are on the planet;

*If there was something obvious detected until now. There must be a hidden correlation, something hidden element, something invisible, and something whose action is not known to the world. In addition there must be something next to us or to interact with us;

The only thing that is common to all is that we are all people and react in the same way and that **we are all possessors of wireless devices**: cellular phones, routers, tablets, laptops or than the well-loved comic performer bagged smart phone.

Mutual Respect-dialog

[<back to content>](#)

This book is written with the intention to transmit useful information for those suffering. My intention, in order to be able to transmit information efficiently, is to make myself understood by most people. In vain did I have a very important for you. If you do not know how to pass on the information or you do not understand does not take place the transfer of knowledge from me to you. I do a monologue or more popular said: "Speak alone". The same happens in the technique. Your radio, for example, to catch a post which transmits, must be granted. To be on the same frequency with the transmitter. It is only in these circumstances we will hear your favorite radio station and not a suite of catcalls or knocking.

These are the reasons that insist, sometimes quite unnerving to understand what read. In vain read if you do not understand. The information does not illuminate at the head of the spark of your knowledge. The information is lost. The importance of the lost information is zero.

If you come with me to the dialog on the internet in chat or other form of communication we have to ask you from the start training what you have. Please do not feel offended. These two reasons very normal.

In the first place I must have pattern discourse to be understood by you. I know very well the subject, are a person very well educated. I must do the best of them all. Whether in front of me is a doctor in science or a mere housewife. But I must know who I am talking about. suppose that a doctor in science understand more quickly than a housewife. May be suitable for technical words on which a housewife does not have where to know. Woman's nuclear I have to explain some of the concepts, when a man trained we assume that it. This is because I have seen many stupid holders of diplomas, some with higher degrees. But anyway the fools shall be

assessed between them in particular. Some are doctors and even teachers in stupidity.

Please do not confuse the confidence of the date of the dominion of the subject with their elite foolish. Are Not pompous at all. Know very well the subject, are keeping an eye on my knowledge and speak because I know. I'm ashamed to say "I do not know when I do not know the subject. But when I know is the subject of the most tenacious than a bulldog which has caught something in his jaws. I do not have views. I belief proven and demonstrable progress. They give me strength to speak. Not their elite make me stubbornly. This is a silly thing to do. Thorough knowledge I go forward. Also I assure you that all my call will be dealt with correctly and with respect but not with kid gloves. I am a person who does not know how to lie. From me you will learn directly and without resorting to the truth. This is confused with arrogance. Maybe it is a dose of conceit, but first of all let me introduce myself experience.

My studies in life are:

*12 years of general school and high school.

The high school graduated with maximum note from me in the country 10 (ten);

*five years the Faculty of Electro technical Standardization Cluj Napoca, Romania. The faculty exempted by note maximum 10 (ten);

*A year army to the radar. Here we worked on workstations radar and know very well the electromagnetic field and the effects of beneficial or destructive.

*30 years in the field electricians, computers and industrial automation.

*I created the factories and production lines for me and for others.

My intention is not to intimidate. No I am not intimidated anybody. It is the print or simply the caretaker at a school in a city obscurity; I treat in exactly

the same way. For me you are all people regardless of race, religion, political or sex. I give you a piece of advice. Will not be intimidated in front of anyone. But for a proper communication between two men each must know whom to address. It might be housewife from the previous rows and to combat the theory quantum mechanics or how he walked around the electromagnetic waves through us and through our own heads. Yes, it can come, but in vain. Does not have the knowledge to substantiate his statement. In this case it might feel offended if you do not think? Do you think that the school of life allows him to make statements that he has no idea about? Life experience in this field is zero. We work with entities which do not see, with immense energies generated by the apparatus pretty ones. The energies in question are held by the electromagnetic waves at distances of kilometers. We work with values for which the US, electronics, that we may work I invented stairs logarithmically not to write many zeroes. For example 0dBm for an electromagnetic wave is $1\text{mW}/\text{cm}^2=0,001\text{ W}/\text{cm}^2$, and -13dBm is a value of $50\mu\text{W}/\text{cm}^2=0.05\text{mW}/\text{cm}^2=0,00005\text{W}/\text{cm}^2$. What are these values? The measurements are my network Wi-Fi 1m respectively at the 7m of my router. The Logarithmic scale is only a tool for work for the specialists. The actual values but are those which causes the effects of unwanted sometimes. To 1m from the router is dangerous at 7m from the router would be dangerous if it was only the router. But at 7m from the router is a laptop with Wi-Fi card issuing the same signal dangerously in all directions and to reach the router all -13dBm but at 1m from the laptop is 0dBm. We are where we are? Less than a meter away from the laptop.

Only this if you understand you is half healed. Interpret for all over the world... and for housewife. This is not like on radio and TV. Radio and TV on there is a transmitter high (extremely dangerous) and a series of

appliances which are called receivers that are harmless, do not issue. In the case of cellular telephony and networks for wireless communication are involved two machines at each point. In the area of relay there is a communication channel which is transmitter = broadcaster + receiver, and in his hand or our sometimes next to our brains there is another transmitter = broadcaster + receiver. The same dangerous both. In the area of the relay there are several channels of emission + reception and they generate an accumulation of energy more dangerous due to the fact the more focus in a confined space. But dangerous, individually are equally as dangerous and what keep us in his hand. Further in this book are described the phenomena of sizes and the actual physical what is happening around us. Please try to understand them. It is for your own good. After you light, it might thank me that I was tough with you. Somebody has to wake up. I know the danger in which you are located. I do not know this danger and those who ignore.

Why doctors from all over the world looking for that wild solution?

[<back to content>](#)

Why not find a solution?

Unfortunately medical systems from all over the world are no longer oriented to make the welfare of the sick man. They are oriented toward their exploitation. The patients have become the only some ants who amass money or procure the money for the health care system. If you don't have money?! Die or suffer! Because it can contribute to their welfare, after that God has punished with a disease, are you still being punished by the system for that you are poor.

Because of this system does not stimulate the minds of doctors. It compels to walk among the protocols and other constraints like the axle itself. Also like the

horse which is not allowed to see into the doctor's side goes forward on the walked before trails, guided by a system asshole.

The doctors are stubbornly to seek the germs and bacteria. They want success! Do not say that they will find! You will find more highly bacteria! But they will still be assigned to the micro-organisms those effects. This "disease" is very complex and involves including the emergence germs.

The germs appear as you see below in my explanations, only in the subsequent steps of the progress of the "disease". Also appear various germs. Depending on the location where is located the man affected may be other and other germs. Because of this only in an insignificant percentage 7-10% will find a certain kind of germs.

Bartonella? It is also Bartonella. Lyme? Yes it is and/or Lyme (Borrelia). Any micro-organism can attack the skin affected by electromagnetic radiation. The barrier compromised the skin allows the attack against all forms of micro-organisms.

Thinking of doctor's stops here. From this point no longer have the knowledge to go on. They are not to blame. The system is not prepared for such a thing. An interdisciplinary correlation it is very difficult to see. The training of doctors is deficient in physical, chemistry, pharmacy, related fields of medicine. What can we understand from electronic, electrical and communications, areas which are developing a very strong and with which we begin to interact. Also the doctors are and very proud and do not want to accept that there are other people who have know more fields of science and technique. Of these causes: ignorance, vanity and the existence of the "rails of the railways" our doctors are moron in front of the multidisciplinary challenges.

Far be it from me to blame them. Even though I congratulate them on dedication with slotting into the fight against diseases of all sorts. It is a profession and stressful - with a great responsibility. The problem is not of doctors that people but of the health care system. Current doctors are simple executives of the procedures set out above by others. So, and now move a little bit, and a trained dog may make diagnostics, if he knows to follow a series of questions and to interpret the answer.

Do not seek for the answer to the doctors. It's not there. The answer is in your mind. Alone you can treat. The information correctly understood will show the way in which you do not suffer from harmful action of radiation solenoid valve.

Read the following! And even with the risk of I repeat, please try to understand what read. It is not an easy reading digest, but is it certain exact and true. It is not the purpose of me to be pleasant. My goal is to help you to expose the Death Eaters invisible and to start to clean out the planet of the garbage. Do not forget that the planet is our house and the house of future generations. We do not throw trash everywhere in the house.

What do the doctors when you do not find a real disease?

[<back to content>](#)

Unfortunately I had to pass through hell to know in what world distorted live. The systems are all populated with half-learned. The most dangerous people possible. I know things only half or repeats like a monkey What Others Are Saying without even to pass through the filter of your own rebellious. Those foolish out of the mouth of a so-called "professor" will be served to others thought less. At their turn will propagate the nonsense of "head enlightened", in the same way, without think.

I, too, we bought several years in a row all the rubbish removed from the doctors. I had the naivety to believe that there are people dedicated to the profession as I in my turn are dedicated to my profession. I was wrong and we paid dearly this fact. I went to death. I missed me now. I will not get rid of it, but I do not wish you to die because of stupidity. So what do you do when the doctors cannot find the real cause of the illness? What to do? Comes up with. The pride of the caste not to leave to recognize the exceed and then comes up with. May not be done in front of the patients and then they will invent notions and diseases to recreate a fictional Universe in which only they have dominion. Cannot handle all the rubbish removed from doctors on the neck. Is it impossible for any person with the brain of the whole." I do not wish to proofread the doctors. I pray to smash this illusion of doctor o'clock of health and to be replaced with the man avid for wealth, and miserly proud that is part of a group of "elite".

I will try in this subparagraph to merely imply a few of the legends of doctors. These legends are so well screwed in our brains that it will be very difficult to see the reality as obvious as it. I myself am addicted to these legends, many times I used their terms create, without even thought too much. For this I apologize. I will not go on the rails. I have my thinking and I trust her. You why you do not trust your mind?

Here are a few of the legends with which it is numb our brains:

"Autoimmune diseases" - translation - Diseases through which our bodies fight against itself.

The highest ordered nonsense that might exist ever. Life is very tough. This is the role of life, to exist. Life is not the fight for the destruction of life. Will do anything it is possible to adapt and if it will go out, will prevail.

There are no autoimmune diseases - than this stupid with autoimmune diseases can you bent his ear at the following phrase. There are incompetent doctors, who have not found the real cause of sickness and instead to seek further, has invented a Name of disease and he said what he had to say "autoimmune disease". Doesn't it seem more likely that has not found him doctor cause sickness. Through this fact that he stopped looking and trying to cover the incompetence with a pseudo science, for me the doctor has become an enemy of health. By declaring a disease, regardless of which, even unknown, he put an end to the searches for others. Halting research at the level of his incompetence. So it has increased the nomenclature of diseases "known" with all sorts of names which more sophisticated than the other and if you ever have the curiosity to dig in real mode in the field you'll be surprised, at a given time, a pass phrase as follows: "The disease of unknown origin or with unknown cause". At least admit that I have no idea.

Give you an example that I should be more easily understood. A disease of unknown origin is Fibromyalgia. You go to the doctor and tell him that you miss the muscles and it will tell you that you Fibromyalgia. OK, if I had no need of translator I was going to a professor of Latin by exactly the same effect. Fibromyalgia comes from two words, one Latin: "Fiber -ae" which means the fiber, Beef, wire or muscle and "myalgia" which means the pain of muscle in the French language. When you went up to go to the doctor you needed translator or you have been that you ached muscles and you wished you to "fix"?

"the immune system" - is an invention theoretical removed on the neck by one and repeated obsessively of all the monkeys, including me. Why there is such a system? Simple, there is a place for the location

of him. Where is it? If anyone could not say where he was with precision muscular system, the nervous system, the digestive system, the required muscle system etc. Nobody can locate the immune system. Why? Because it doesn't exist. You are able to locate something that does not exist? I don't.

There is a reaction of immune response at the level of each cell which is guided by the genetic information gained in the million years ago in the DNA. It shows how he can defend himself cell in case of the occurrence of disturbance or harmful. This defense is the same for all the cells. They all will act in the same direction and will create the impression of an action ordered, targeted. But it is only an impression of the system, there is nothing coordinated. Simply All the horses are pulling in the same direction.

The "cancer" - is a form of defense of the body against the disturbing factors. Is a form of rejection of nuisances of any kind. Cancer appears as a state of irritation of long duration with the low intensity. This low strength leads to a reaction from the cell. This is how he knows. Try to reverse the effects of those factors harmful. Instead it should be noted that the action of such harmful factors takes place in a long period of time. Delivered Energy of the cell is of low-intensity, but it is sufficient to create the questing forms the reaction. This form of defense is seen by doctors that a disease and fight with great determination against her. The fight against cancer is the fight against its own recovery. Is the struggle against the signals of the alarm pulled by our body. It is a typical example of imbecility medical and stopping the thinking to the middle of the road. Nobody is interested in causing this reaction? Nobody wants to carry the mind further? What is before this reaction of the cell? Nobody thinks logically this Earth? ...

Unfortunately there is no thinking. All applicable to "recipes" all apply like the apes what they saw to others. The whole thing is one big airs.

Chapter 4: The Responsibility

[<back to content>](#)

The responsibility is a noble. It is about that feeling that appears in certain people who are a bit more trained than others and that is manifested through a care on its own shares and by reference to the others. Each we cannot apply a indifference. "After us the deluge" is the belief of many in this world. The new we will be all right, by the other we don't care, it is the ideal of many in this world. The same shall also include the monkeys. They fight with each other for survival. It is a natural law of evolution. Escape who can.

At the level of humans who think they are the upper, i.e. at the level of the man, there should be systems of compassion, systems of thought for its own being. Systems that to say that those things will lead to the extermination of the species by individual extermination. These systems shall be summons you responsibility. To see more than the nose and to see the consequences of your action on the others on you as an individual and on the whole world of mankind as a society as a whole. Are very few responsible people on this planet." All others are guided by primal instincts. The greed to take over material goods as many, irrespective of the consequences, has brought us to the stage to seek the shadow in a heated oven. This shadow we will ever find because there is nothing to make a defense shield against heat generated by this the oven.

Ignorance or complicity?

[<back to content>](#)

At a time (there is no need to remember when nor does it have such a great importance as long as they are put in the service of the potential assassins and ii appear) the World Health Organization," it loud and clear, without asking anyone that cellular phones are not

dangerous. I wonder how the cost of dissemination of this rubbish? Wonder how many specialists has been a hand to silence.

Including a health minister from Romania has also airborne he came up. What he knew it was just an accountant?

These phenomena eat on bread only in the faculties of profile, in the army, telecommunications and radar and there you instruct them and how to defend yourself from radiation. The civilian population is not informed and even trained in order to be able to defend the undesirable effects of the electromagnetic radiation.

Now, electromagnetic radiation, already under any inspection, direct attack ordinary people. The explosion of advertising baits made of wireless devices has led to the development of a specific of pleasure ephemeral, but which, in the short time it will prove to be one of the Death Eaters.

The fog and smoke bombs

[<back to content>](#)

For a few months in the year 2015, the heir of the Empire Samsung and apologized because of their own hospital of the company, has escaped a virus.

Has not got rid of nothing. Koreans also in the south of the country are crazy after the internet. There is developed a system Wi-Fi. The huge amount of radiation thrown in a narrow space result in burning of the tissues, to react to reject flulike. But these are merely doormat cells and nerves. There is no virus or bacterium. All of these are misinforming man. There is instead electromagnetic radiation in the high-frequency which will irritate all our cells and in particular the mucous membrane which have exactly the concentration of liquid required to act more quickly to the action of radiation. People will constantly sneezing if their nasal mucosa will give spurious pulses, misinformation,

actually. As a matter of fact viruses and bacteria there where there is electromagnetic radiation. Is the edge before the cells of our bodies are dead mono cellular organisms which are much more sensitive to electromagnetic radiation than the human body?

Is a classic example of petard thrown for misleading the public opinion and moving prying on a medical problem when there is a problem with the technological pollution they and others like them are directly accountable. Medical Problems are very real, but are the direct effect of the amount of energy emitted into the space of the appliances on which their companies manufacture.

For something else should be to apologize. For the fact that it does not comply with those acts of safety with regard to the emission of electromagnetic radiation and the fact that the current technology to combine the more light-emitting radiation in tight spaces which, in this way become spaces toxic.

Would no longer have to apologize for the fact that before removing the on the market products that are potentially hazardous have not ready for the proper use of these electromagnetic grenades which so easily sell them. They have created along with the other producers of wireless equipment an environment similar to a "Russian Casters". Distance of 30 cm can make the difference between a man healthy and a sick man. They removed for sale appliances extremely dangerous without to train the population with regard to use them in a safe manner.

I made reference to the producing company, just to give you an example. Equally guilty are all firms producing wireless equipment. So if you want me to sue to come all. I have decided that after the publication of this book to make a criminal complaint for genocide against all those who produce and distribute radiation, all are guilty. All are guilty because pay specialists

irresponsible people who don't know all aspects of the technical problems and make for sale appliances are dangerous to human health. As you will see below "I already know how to appear.

As you will see in the following "I already know how to protect me and my family.

Another road closed is so-called "chemical trails" (Chemtrails). Another petard. This idea is promoted and maintained in the illusionary hope that the danger can be seen. It is a visible pollution and spectacular. Is found everywhere along the world after each airplane flying in the sky. Is dangerous, but not so dangerous "invisible" which represents a huge loss of energy transmitted strength. Mock the environment. Chemical Pollution is a significant pollution in the balance of the Earth, but this pollution is made with chemicals which are palpable and can be filtered physically. Pollution of the solenoid valve has a single remedy. Placing the body in a cage Faraday effect. I do not want to stay behind some protective screens or cages metal. I was born free. I will try to get on those who are polluting in a cage of steel.

Another side of things is human psychology. The lack of a culture link and detachment in the direct relationship with the nature of it that many people to begin to be afraid of things normal. They will see the enemies all over the place and will take place a rollover of the notions and values. Items that are natural, normal for anyone, their will seem strange and very dangerous. Fear will blacken the judgment normal and will bring in a phase in which will install a sort of auto terror. Ordinary people, deprived of basic education will even exaggerated the dangers often will reverse roles. The is dangerous shall not be levied as harmful to them and what it is natural you will perceive hostile. Very many have the feeling of combustion of the tissues in question due to heating microwave signals present in such

pollution invisible. This happens for a long time. Have paired this heat with that from the sun. But I can see that the warmth does not disappear when the sun goes down. Then extrapolated and the only item that you see any more remains to charge of all the aggressiveness of a revenge blind. The sky remains to be blamed for the heat on what he feels he lavished all the hatred on the sky. This is what happens to all those with the Education precarious and from those for which the school was a chore. Unfortunately I have to declare that the main responsible for the heat on what he feels is even the person concerned, him. He and all the Macaques who had cell phones or Wi-Fi routers started. Together they are working to finds intensification opened fire in the microwave becoming our planet. He looked a dumb mug to heaven and cursed the sky for that jerk he wears throughout the oven in your pocket or hand. Some even take photos with that "the oven" and wondered why he was burning in his hands and cheeks and face.

All antipathy makes some to look like fools to a "flocus" banish frizz forever it sticks the handbrake due to prevent electrostatic charging natural. "You saw what a miracle? Sure it is dangerous. Is the devil. „Let me? Only the devil was that has changed you steering while you were going to school and you just walked up to the bar at the place to go to the times of the physics. It is part of the same phenomenon psychological humiliation of human intelligence, distorting reality and hyperbole of danger. You are prompted to switch the attention of the people on the things dangerous goods on the harmless things and assigned them attributes, which they do not have, devilish.

What is the most dangerous, but is credulity of the people and the temptation to fool the colored beads. It is a beautiful device which most of the times is given only for free to subscribe to the source of the deadly stricken.

Thus, under looks of the tool, hides a dragon much more dangerous than the stories with the fairy of our childhood. The temptation of the new and especially as these small appliances incorporates several functions, which normally were made, each other separate appliances makes us to be intoxicated securely without to see the fact that we killed drop by drop. Now these small lovely devices are:

- *telephone, fax, telex;
- *self filmed and/or camera;
- *pen, PIX, Voice Recorder;
- *stereo or pick up;
- *TV, video-player or screen the theater;
- *personal computer;
- *personal address book;
- * directory of telephone;
- *specification notes;
- *mailbox;
- *mirror (before you make selfie);
- * measuring device.

How can you not to be tempted by so many appliances, devices or even objects into a single device observed? You can't.

And then you leap like a fool in the mirage created by so many facilities and you do not know that behind the beautiful things to hide the beginning of your death. Sit almost all the time with that device in her hand, you take it to the head, next to the brain, walk around him, if you are in the front and in a handbag, in addition to the ovary, gates along the body. God knows that you are frying? I don't. The time spent on the next to this device is essential in the equation of your illness.

Lyme is a real disease but is used to cover something else

[<back to content>](#)

Above we talked about the responsibility and those I must try to separate the actual disease Lyme of petards used to cover this mess.

The disease Lyme is produced by a bacterium called *Borrelia* and which is carried by the human consumption by parasites. Some say that the mosquitoes are suspected to be carriers, but I sun pretty skeptical to believe it.

Infecting takes place as the tick feeds. To feed there must be a place in which the skin has been penetrated the jaws of the entry. If there is no this place is not Lyme is different. Another important aspect what is lost sight of. Not all ticks are infected. So the likelihood to be infected diminishes dramatically.

The appearance of the characteristic of infection is primarily the existence of the biting and then the existence of concentric circles around the biting. These alternating colors are red, white, red, white, and at least one alternation. If the two are not satisfied at the same time we cannot speak of Lyme. We must look elsewhere.

Also the reaction can be in a few places. The parasite does not change the place. Can be a few mites, but may not be by the dozens. In addition if you bite a parasite company you'll notice it. In the first place, bite when it hurts very loudly. The parasite is not down until it is not fed. In that moment is large and is visible to the naked eye. If you have seen these things you might have Lyme. If you are not sure is nothing else. In addition consider the life style which can bring you in contact with these insects. You play through the grass; you dog or do walks through nature? If yes, you can have the Lyme.

These are the logical arguments, of good sense that can make to distinguish the actual disease Lyme the petard "disease Lyme", which is something totally different.

"Smoke bomb" or "Chronic Lyme" is used to cover a severe chief of which have exactly the same symptoms

with sickness real. Is a disease false. It is in fact a form of the disease of radiation, a chief with a source other than the sun. So do the difference. One of them is the infection other is burns. Burns solenoid valve or the so-called "burns when cold" is a precise description of this disease whose early stage is attributed to the allegedly bacteria.

The fog in human eyes is difficult to spread.

[<back to content>](#)

As we have mentioned above, are an intelligent person and very hard to fool. In addition have very good notions with which I am working and not talk about what they do not know. And the methods of misinformation I'm not even foreign matter. I have lived in Romania during the Ceausescu and know the methods used to pluralism. Are effective methods that these disciples less clever of those spies they apply. My surprise is that they go.

Which is the technique?

To say that comes a crazy as me and Post on Facebook an exact information and useful to millions of affected. This information was interfering with their plans. Not a can leave even to make the beach, not a can let you reach people, but no one can make it disappear. Immediately appears a person "kind" which charges, suddenly, a multitude of nonsense, half-truths or shocking things, or kitties and puppies stupid which have no connection with the subject. In this way, throwing on the page a huge amount of waste intellectual, useful information and correct is dilute. Useful information is not visible under the ocean of banalities. This technique of misinformation is the main reason for which you are still ill." Not the disease is serious, but the fact that someone strove to hide the useful information from the eyes of those concerned. Your eyes are not allowed even to feel a gleam of truth

which is exactly under the nose of yours The disease, if good information is received and used properly heal pretty fast compared to how serious it is. This is only possible by selecting the useful information from the ocean of waste. But this does not can make him anyone. You must have a sound knowledge in order not to be worn to misinform in other areas. You must know how to discern truth from falsehood and for this you need a tool. The brain is the tool to be used to the maximum here. He tells us what is important. But for that the brain should be able to take us out of the misinformation must be very bushy and have a color, dirty gray. The brain and the truth wear clothes of gray. If you will see the other colors to these two entities is not well at all. The wheat veil is the color of the brain and of the truth.

Criminal ignorance or complicity death?

[<back to content>](#)

Those who are in charge with the health and safety in the United States are crazy to the right and a gross incompetence. For some time I made conversation with a friend in the United States on the theme of the wounds that we have somewhat similar. I found out that he too is just like me. Car crashes and washes the hard with isopropyl alcohol. Up here all the good and beautiful. I do the same. To me the wounds are closed. So what advice I give him? One very natural. Continue to cure with isopropyl alcohol. Tells me that medicinal alcohol is dangerous to drink a thing which put on his thoughts because to us if the dilute is not dangerous. But if by premonition I have an idea: Let us see what my friend is in fact. Search on the Internet medicinal alcohol in the USA. With stupor to learn that is isopropyl alcohol 70° searching my documentation in an area unadulterated by stupidity of modern world. And what do you think? A leaflet of a Romanian manufacturer of isopropyl alcohol. Begin to read and I bounce. My friend has no chance to

ever heal if him continue this treatment. Will reproduce on the package leaflet.

"dangers to health: acute effects: skin injuries; chronic effects: to persons with pulmonary disease, disorders of liver and kidneys, exposure to isopropyl alcohol may lead to the aggravation of these diseases.

And below

4. First aid measures: symptoms of intoxication will be prompted the advice of the medical practitioner. In the case of the loss of knowledge will not manage anything oral. Eyes: the vapors cause skin irritation of his eyes. Contact of fluid with eyes can cause burns to the corneal, injuries significant of his eyes. Wash immediately and thoroughly with water for at least 15 minutes. Consult your doctor immediately. LEATHER: Causes skin irritation to the skin and to pin extended can lead to redness, the dryness or cracks of the skin. Chronic can lead to dermatitis. Remove contaminated clothing and shower. Consult your doctor immediately. Wash contaminated clothing before use. Inhalation: Produces irritation of the respiratory tract disease. Exposure to high concentrations of vapors creates the narcotic effect leading to the symptoms of dizziness and headaches, unconsciousness and even death. Take the person in a well ventilated area, if breathing is difficult do artificial respiration call a doctor immediately. INGESTION: abdominal pain, nausea, vomiting, cramps, diarrhea. If ingested a large quantity can cause unconsciousness or death. Consult your doctor immediately. Do not produce vomiting. Do not administer anything orally if you are not authorized by or on the order of a physician."

This product is sold on the post of alcohol in the United States? No wonder now that will not "fixed". You do not have a chance. These people would you did. They do it fairly effective.

My dear friend, your wounds are wounds chemical burn. All burns, but chemical My wounds are wounds of burns solenoid valve. Possible that and yours to be switched on as a solenoid burn just like mine, but now they are chemical burn. Because of this cannot be closed. Isopropyl Alcohol does not let them to close. Do not use isopropyl alcohol. Let the wounds to stand for one week. Use and what do you use the everyone ethyl alcohol or if you do not find in the shops take tequila anyway is much better than topical isopropyl alcohol. Will pity you the Americans. Experience the dangerous. You're all a bunch of stuntmen among many safety hazards. And you want to export this style of life. No, I do not have to accept this danger. You have confidence in the criminals. I do not have and I would not ever. I am linking to the environment. To my environment. On your hold it to you at home or make it more user friendly with you in the first place.

Which is the thing that makes me be so sure I am right?

[<back to content>](#)

People are intelligent beings, but very naive. Can be deceived very easily because they are proud. They think they are important and want to be thrown into account. Even find it a blasphemy if someone does or ii apart. I am trying to stay away from this human disease and to open his eyes. I will do you will open your eyes. I will call in continuous mode to think about.

I will make the following an exercise of logic. Please look for you to learn the course of this exercise. Can be applied anywhere and to anyone.

The motivation is that something that set into motion the things. Are asked a question logic. „Why get out of my comfortable couch, where calm, seclude myself and belched loudly a beer, to pick her stockings and to put in place (or washed)? „ This is the question

the men married. Normally and most of the times forget that somewhere near the very top of the him there was motivation. If it is not, the consort comes with metal motivation with clevis and a "stage" aggressively on top of the head. Therefore not to take a large skillet in the head give up the comfort of the sofa and we will lead stockings where it is intended to be.

Another aspect is that of the pursuit of the waveform of the money. In what direction they go? The blending the motivation with the money must lead to a question of the form: "What would make an individual or a group of individuals to spend money to make this action? To take one at a time some of the rubbish on the Internet. I have not nerves analyze all. If you want to spend time take this model of thinking and apply it to what nonsense posted on the internet you want. Works with all.

*Chemtrails (chemical trails). Are condensation trail remaining after the aircraft that flies at high altitude and in layers of cold air. Some believe that they are poisoned deliberately and someone from the plane glanced over us with chemicals or bacterial. Using this procedure will reduce the population of the world. Why would anyone do such a thing? Should provide substances, kerosene to pay the pilot and plane. It seems to me Complicated and expensive. In conclusion we have very money **spent**;

*Super bacteria. This implies that the scientific research, bacterial cultures, containers and special tools for handling and storage special etc. a lot of **money spent** on such activity;

*heavy metals. This is a problem of the mines all over the world and when there are mining. Anyway would like may not to extract all the metal from ore. They shall remain under the form of powders and can be worn by the wind. Those measures shall be taken to

stabilize the tips and the reduction of pollution. But I still get rid particle filter and thus pollutes large surfaces, but are located on a territory relatively small. For anyone to pollute intentionally with particle also will have to pay huge sums of money out of his pocket. They represent **money wasted**;*genetically modified organisms. Another coverage and downright lie as and the fear of the E-of Europeans. They may not be the cause because between us and these substances there are several natural filters located on the path digestive tract and which decay ingested substances at the level of the molecule or ions and then get in our body. Though he closed in the body, the digestive tract is an open interface with the outside. Here many of the dangerous things are destroyed. If we go back to the money to know that the creation of such bodies shall mean a lot of money spent in research and in their production and I'm thinking that their effectiveness, if they want to exterminate us, will not be obtained on a route where there are so many barriers which can stop the action of this "poison". To be seen. I do not think that they are stupid. **What is happening in case the electromagnetic radiation?**

*electromagnetic radiation is at the bottom of a of communication technologies which made it possible to the emergence of attractive devices for the people. Although there are huge expenses for the development of the technology to an end they shall be recovered and we have a lot of **money cashed**.

*The Devices produced by this industry to reach us. They are made to distribute a service. This service shall be distributed on the basis of contracts and with a periodic payment not very low. The subscriptions represent other **money cashed**.

*electromagnetic radiation destroys the cells and by this determines the loosening of the components and of the emergence of any known diseases. The Doctors just waiting to be sick. You go to the doctor and pay the doctor and the system default a lot of money. From the point of view of the system are **money cashed**.

I could continue, but I did not come to mind other arguments. It is not so important, you can find them you. As the me will I remember I write to them here? Important, but is a question of relevance:

You, if you were to choose a method of require decimation of the population that method would be the method which would attract. That in which you going to spend your money or those in which you will receive money?

Well, they have chosen much that method in which you will get diseased by paying for this and then paying repeatedly to fight. They invented the mother of all diseases. They make a lot of money and they do not give a damn about the US. We do not suffer and pay like fools to be drunk. Furthermore, some of them even like this.
